

## Module-3(Projects)

1) Describe a key project you have worked on or are currently working on.

- I created one project in diploma that is one kind of application.
- and that's name is tiffin treat .
- A any kind of person order and receive meal and tiffin.

2) Explain the technologies used, the scope of the project, and its objectives.

- In this project we use flutter and dart language.
- App is android and IOS base application.
- If any kind of person provides tiffin service so they can use our app and register they service and easily establish they tiffin services in market.
- our app provides home made food for students and workers and delivered directly customers home and work place

3) Highlight the challenges faced and how you addressed them, showcasing your problem solving skills.

- In this project I faced a many problems , errors etc. I easily managed that problems.
- First we face delivery problem so we find that solution is fast and shortest paths for delivery.
- Second problem is how we convenes the people that they register his tiffin service in our app so we decide that we explain about our app and how our app is very benefit for his business .
- So this kind off problems we face also we use other source for problem solving.
